*ResearchArticle / The Relationship Between Pre-School Teachers' Computational Thinking Skills and Their Use of Technology*

## **Editorial**

The OPUS Journal of Society Research (OPUS JSR) brings together a diverse range of theory, practice, and research in the pursuit of understanding human behavior in its social context. The interdisciplinary viewpoint lays the groundwork for presenting and establishing a holistic relationship with other disciplines, concepts, and methods. The OPUS JSR allows researchers to use an interdisciplinary approach to present different interpretations and alternative points of view. The theoretical frameworks that underpin the analyses and interpretations of the subjects under study are as important as the intersection of disciplines. This framing can lead to greater clarity of multiple, even contradictory findings, allowing for a better understanding of social dynamics that would otherwise be invisible if scholars concentrated on a single set of theoretical dynamics.

OPUS JSR reflects more than 10 years of journal sponsorship by ADAMOR Society Research Center and its partner organization, the Institute of Urban Studies. The OPUS Journal of Society Research is the direct successor of two previously published journals: OPUS Turkish Journal of Social Policies and Work Life Studies: OPUS International Journal of Society Research (ISSN 2528-9527 E-ISSN 2528-9535).

OPUS Journal of Society Research (JSR) is abstracted in EBSCO Information Services, ERIHP-LUS European Reference Index For The Humanities and Social Sciences, Cite Factor, TEI Index of Turkish Education, ULAKBIM TR Index, SOBIAD Citation Index and ASOS Index.
